

## Acknowledgments

---

Publication of this issue was supported by the Agency for Healthcare Research and Quality (AHRQ). The U.S. Preventive Services Task Force (USPSTF) is an independent, voluntary body. The U.S. Congress mandates that AHRQ support the operations of the USPSTF. The opinions or views expressed in this professional education supplement are those of the authors and do not necessarily reflect the opinions or recommendations of AHRQ or of the USPSTF.

No statement in this report should be construed as an official position of AHRQ or the U.S. Department of Health and Human Services. Administrative and logistical support for this supplement was provided by AHRQ through contract #HHSA290-2010-00004i, Task Order 4.

Dosages, indications, and methods of use for products that are referred to in the supplement by the authors may reflect their clinical experience or may be derived from the professional literature or other clinical sources. Because of the differences between in vitro and in vivo systems and between laboratory animal models and clinical data in humans, in vitro and animal data may not necessarily correlate with clinical results.

AJPM Deputy Editor William C. Wadland, MD, MS, served as the acting Editor-in-Chief for this issue.
